

APPLICATIONS

- Used as primary filter in a small irrigation system or as a back-up field zone filter.

FEATURES

- The perfect solution for small farms and for in-field back-up filtration
- Save labor with simple flushing. Just open the flush valve and rotate the handle
- Pressure differential sensor allows you to easily see when a filter requires flushing
- Large 316 stainless steel screen reduces maintenance and provides longer operation before flushing intervals
- Stainless steel clamp and semi-auto flushing mechanism are both durable and easy to use

SPECIFICATIONS
