

APPLICATIONS

- Pressure boosting
- Water supply & Treatment
- Wash down
- Boiler feed
- Hot or cold water circulation
- Irrigation

FEATURES

- Full stainless steel
- Easy installation
- Fabricated stainless steel impellers and diffusers
- Oversize ball bearing ensures long motor bearing life
- Removal of the mechanical seal without dismounting the motor (VR15-20-30-45-65-95 models higher than 5.5 hp)
- Standard balanced mechanical seal
- Uses standard motor, does not require high thrust motor configuration
- Tungsten carbide intermediate bearing
- UL certified to NSF/ANSI 61 & 372

TECHNICAL DATA

- Capacity: Up to 600 gpm
- Total Dynamic Head: Up to 800 ft
- Liquid Temperature: 5 °F (-15 °C) to 248 °F (120 °C)
- Working Pressure
 - Round flange: 360 psi
 - Victaulic®: 360 psi
 - Oval flange: 230 psi
- Power: Up to 60 hp
1 or 3 phase
